

CROWNCOM

General Chairs

Thomas Kaiser,
Leibniz Univ. Hannover(LUH), Germany
Markus Fidler,
TU Darmstadt, Germany

General Vice-Chair

Andreas Wilzeck, LUH, Germany

Program Chair

Maria D. Pérez-Guirao, LUH, Germany

TPC Chairs

Carlos Cordeiro, Intel Corp., USA
Luiz A. DaSilva, Virginia Tech, USA
Aarne Mämmelä, VTT, Finland
Lars Berlemann, Dt. Telekom AG, Germany

Panel Chairs

Petri Mahonen, RWTH Aachen, Germany
Christophe Le Martret, THALES L & JS, France

Special Session Chair

Sven Zeisberg, HTW Dresden, Germany

Tutorial Chairs

Klaus Moessner, Univ. Surrey, UK
Maurice Bellanger, CNAM, France

Sponsorship Chair

Feng Zheng, LUH, Germany

Web & Publication Chairs

Souhir Daoud, LUH, Germany
João Paulo Miranda, LUH, Germany

Local Arrangement Chairs

Kim Bartke, LUH, Germany
Henrik Schumacher, LUH, Germany
Eva-Maria Schröder, LUH, Germany

Financial Chair

Barbara Adler, LUH, Germany

Conference Consultant

Maria Morozova, ICST, Belgium

Publicity Chairs

Europe
Maria-Gabriella Di Benedetto,
Univ. of Rome La Sapienza, Italy
USA
Ozgur Oyman, Intel Corp., USA
Asia
Cheng-Xiang Wang, Heriot-Watt Univ., UK
Australia
Sam Reisenfeld, Univ. Tech. Sydney, Australia

Steering Committee

Chair
Imrich Chlamtac, Create-Net, Italy
Members
Honggang Zhang, Zhejiang Univ., China
Rajarathnam Chandramouli,
Stevens Institute of Technology, USA
Thomas Hou, Virginia Tech, USA
Francois Chin, I2R, Singapore

4th International Conference on Cognitive Radio Oriented Wireless Networks and Communications

22nd-24th June 2009 in Hannover, Germany

The owned spectrum allocation model in use today is believed to be obsolete. Firstly due to its intrinsic principle of fixed resource allocation that leads to a supposed spectrum scarcity, later revealed to be a question of non-efficient utilization. Secondly comes into play the need of introducing new wireless applications and services, which have experienced a huge growth in the last couple of decades, and are now supposed to cope with a multitude of already deployed standards. Both scenarios motivate the use of dynamic spectrum access in order to turn primary licensed networks into dynamic spectrum access networks (DSANs). This lends itself to cognitive radio, an enabling technology that will benefit several types of players and help to implement a more efficient approach regarding spectrum requirements in the future.

The aim of this conference is to bring together the state of the art research contributions that address the various aspects of cognitive wireless systems and technologies, including a broad range of communications, networking and implementation issues. We seek original and unpublished work not currently under review by any other journal, magazine or conference.

Topics include, but are not limited to, the following:

Track 1 – New Trends

- Regulations, standardization and implementation for Cognitive Radio
- Dynamic spectrum access networks (DSANs):
 - Secondary markets
 - Business models
 - Industrial role
- Trust and security mechanisms

Track 2 – Interference and Coexistence Analysis

- Interference metric modeling
- Beamforming, MIMO and anti-jamming channel coding as interference avoidance strategies
- Radio resource management and dynamic spectrum sharing
- Spectrum sensing mechanisms and protocol support
- Wireless network co-existence
- Ultra-Wideband cognitive radio systems

Track 3 – Networks

- Novel adaptation and optimization algorithms suitable for Cognitive Radios and Cognitive Radio Networks
- Analysis of performance and performance enhancement methods of CRs, including methods for network management and QoS-provisioning.
- Self-organizing mesh networks and autonomic communications
- Applications of cognitive networks (e.g. emergent and public safety networks)
- New architectures and platforms for cognitive radio & software defined radio
- Radio access protocols and algorithms for the PHY, MAC, and Network layers
- Cross-layer cognitive algorithms

Track 4 – Research Projects

Large on-going Cognitive Radio & Networks related research projects in Europe, USA and Asia are encouraged to submit their latest results to CrownCom 2009.

In association with

Important Dates

Paper Submission Due:	2 nd March 2009
Tutorial Proposals Due:	23 rd February 2009
Special Session Proposals Due:	3 rd November 2008
Acceptance Notification:	20 th April 2009
Camera-Ready Papers Due:	4 th May 2009

Call for Papers
